

Adobe INDESIGN FOR IPAD AND TABLETS - 1 Day Course

This course is specifically designed for existing users who was to convert or create publications with the Adobe Digital Publishing Suite for publishing to the iPad or other tablets. The Adobe Digital Publishing Suite pulls all the pieces together so you can create interactive, hard-to-putdown tablet publications.

Who is this course for?

Those wanting to add rich interactive features to their content for conversion through the Adobe DPS system for global distribution onto the iPad (iOS) and other tablet devices (Android). In this Adobe InDesign for iPad course, you will learn to use InDesign, in conjunction with the tools in Digital Publishing Suite, to create interactive documents, complete with media and links, for publication to iPad. This course is geared toward experienced InDesign users who are familiar with basic features, such as style sheets, image placement and document management.
